### PROFILE

Dynamic backend developer with 2 years of experience, specializing in JavaScript, Node.js, and Express.js. Proficient in building scalable backend solutions, with a strong commitment to continuous learning and delivering high-quality results. Adept at collaborating in teams, managing projects efficiently, and delivering solutions on time.

### WORK EXPERIENCE

#### MERN Stack

**Gamecrio Studios Pvt Ltd** february 2025 - Present

- Currently working on a payment system project that includes various functionalities to streamline financial transactions.
- Utilized modern technologies and frameworks to ensure robust backend solutions and efficient data handling.

#### MERN Stack

**Impetrosys pvt ltd** August 2023 - january 2025

- Delivered dynamic web applications that facilitate user interactions and improve overall user experience.
- Ensured high standards of quality and functionality through diligent testing and code reviews.

#### MERN Stack

**ZecData Technology pvt ltd** June 2022- July 2023

- Achieved outstanding results in website design and development, focusing on backend solutions.
- Collaborated with cross-functional teams to implement high-quality features and enhancements.
- Enhanced application performance by optimizing backend processes and database interactions.

## **Projects :**

### **BTC Project :**

- Comprehensive Online Payment Platform: Currently operational, facilitating seamless transactions among merchants, customers, and admin users.
- Admin Panel: Intuitive interface for managing user roles (admin, merchant, customer), overseeing transactions, and generating reports.
- Merchant Functionality: Tools for merchants to manage products, process payments, and track sales effectively, integrating multiple payment gateways like Paytm and PhonePe.
- KYC/KYB Compliance: Robust processes in place to ensure compliance and enhance security for all users.

### **Land Share Platform :**

- Developed an online platform for real estate transactions, providing users with a seamless experience.
- Implemented user authentication and authorization features, enhancing platform security and user experience
- Technology: React.js, Node.js, MySQL

### **Revealera :**

- Trend Analysis: Analyzed global hiring and SaaS product trends for over 4,000 companies, providing valuable insights into market dynamics.
- Data Visualization: Developed interactive dashboards to present data trends effectively, aiding stakeholders in making informed decisions.

### **Payroll Management System:**

- Comprehensive Salary Management: Developed a payroll system to manage employee salaries, increments, and generate salary slips, ensuring accurate and timely payments.
- Employee Self-Service Portal: Implemented a self-service portal for employees to access their salary information, tax details, and download salary slips easily.

### **College Management System :**

- Attendance Tracking: Integrated attendance tracking features for students and teachers to monitor attendance records and generate reports.
- Fee Management: Developed a fee management module that allows easy tracking of fee payments, generating invoices, and sending reminders to students.

### **Infotech :**

- QR Code Scanning for Vehicle Information: Developed a system that allows users to scan QR codes to retrieve information about two-wheeler and four-wheeler vehicles, including owner details and contact numbers.
- Real-Time Notifications: Implemented functionality to send instant notifications to vehicle owners when their QR codes are scanned, ensuring timely communication in situations like traffic signals or accidents.

Passionate about leveraging technology to solve real-world problems and committed to continuous learning.
